Presentation

The FERTILPOT is a biodegradable pot made of **wood fibers**. It is used and suitable in horticulture, ornamental, viticultural or forestry nurseries, as well as in market gardening.

Its **penetrability by water, air and roots** is exceptional. This property, combined with its good mechanical resistance, has made the success of FERTILPOT throughout the world.

FERTILPOT can be used by everyone who are looking for a faster cultivation, an excellent root system and no transplant shock when planting into the soil.

It is also the solution to the need of the users who are looking for **“ready to plant” products which respect the environment.**

FERTILPOT in few words :

<ul style="list-style-type: none">✓ « Plantable » : the plant can be put into the ground with its pot✓ Natural : wood, only wood✓ Local sourcing, wood PEFC certified✓ Compatible with Organic Farming (according to RCE 834/2007)	ECOLOGY
<ul style="list-style-type: none">✓ Root pruning : no root coiling, stimulation of secondary root growth✓ Permeable to the air, water and roots.	AGRONOMY
<ul style="list-style-type: none">✓ Productivity gain : faster repotting, reduced planting densities.✓ No more storage or treatment of plastic waste✓ Made in France, local sourcing of raw materials	SOCIAL ECONOMY

Presentation

FERTILPOT range is very wide to cope with the diversity of situations. See our list of references. The pot can be round, square, with or without lugs; their dimensions vary between 4 x 4 x 5 cm (35 cm³) and 17 x 16 cm (3 liters). The pots can be packaged in a tray (FERTILPACK).

Below our main models:
